1. Introduction

1.1 Purpose

The Asset Management System is a comprehensive web-based application designed to help Jirani Smart Limited track, manage, and maintain their assets throughout their lifecycle. This manual provides step-by-step instructions for all users to effectively utilize the system's features. Here is the current url of the system: <https://www.assets.caretakerlogistics.co.ke/>

1.2 System Overview

The system provides the following core functionalities:

- **Asset Management:** Register, track, and manage organizational assets
- **Assignment Tracking:** Assign assets to employees and maintain assignment history
- **Expense Management:** Record and track asset-related expenses
- **Repair Requests:** Submit and manage repair requests with workflow approval
- **Reporting:** Generate comprehensive reports on assets, expenses, and activities
- **User Management:** Role-based access control for secure system usage

1.3 User Roles

The system supports two primary user roles:

Admin	Full system access including configuration and user management	All features
Standard User	Access to daily operations and personal records	Limited features

>**Note:** Other system roles can be added by the system admin (users with the Admin role)

2. Getting Started

2.1 Accessing the System

1. Open your web browser (Chrome, Firefox, Edge, or Safari recommended)
2. Navigate to your organization's Asset Management System URL
3. The login page will be displayed

2.2 Logging In

1. On the login page, enter your registered **Email Address**
2. Enter your **Password**
3. Click the **Login** button
4. Upon successful authentication, you will be redirected to the Dashboard

> **Note:** If you forget your password, contact your system administrator to reset it.

2.3 Logging Out

1. Click on your **profile name** in the top navigation bar
2. Select **Logout** from the dropdown menu
5. You will be redirected to the login page

2.4 Navigation Overview

The system interface consists of:

- **Top Navigation Bar:** Displays the application name, your profile, and logout option
- **Sidebar Menu:** Main navigation menu for accessing different modules
- **Content Area:** The main working area where pages are displayed

Sidebar Menu Structure:

Dashboard	-	System overview and statistics
Assets	Create, View	Asset management functions
Assignments	View, Assign	Asset assignment functions
Expenses	Create	Expense recording functions
Repair Requests	All Requests, New Request, Workflow Config	Repair management
Reports	Assets, Expenses, Assignments, Repair Summary, Action Logs	Report generation
Administration	Users, Roles, Branches, Departments, etc.	System administration
Settings	System Configuration	System settings

Admin only

3. Dashboard

The Dashboard provides a quick overview of your organization's asset management status.

3.1 Key Performance Indicators (KPIs)

The dashboard displays four main KPI cards:

Total Assets	The total number of assets registered in the system
Total Asset Value	The cumulative purchase value of all assets (in Ksh)
Total Expenses	The total amount spent on asset-related expenses (in Ksh)
Active Assignments	The number of assets currently assigned to employees

3.2 Charts and Visualizations

The dashboard includes several interactive charts:

1. **Assets by Type:** Pie chart showing distribution of assets by category
2. **Assets by Status:** Chart displaying assets grouped by their current status
3. **Assets Distribution by Branch:** Bar chart showing asset distribution across branches
4. **Monthly Expenses Trend:** Line chart showing expense patterns over time

3.3 Recent Activity Tables

- **Recent Expenses:** Shows the latest expense entries with date, asset, type, vendor, and amount
- **Recent Assignments:** Displays the latest asset assignments

4. Asset Management

4.1 Creating a New Asset

To register a new asset in the system:

1. Navigate to **Assets** → **Create** from the sidebar
6. Fill in the required fields:

Asset Type	Select the category of the asset	Yes
Asset Tag	Auto-generated based on asset type	Auto
Manufacturer	Enter the manufacturer name	Yes
Model	Enter the model name/number	Yes
Serial Number	Enter the unique serial number	Yes
Status	Select the current status	Yes
Location	Select the branch/location	Yes
Purchase Date	Select the date of purchase	Yes
Purchase Price	Enter the purchase amount	Yes
Notes	Additional notes (optional)	No

3. Click **Save Asset** to create the asset record
4. Click **Cancel** to clear the form

> **Note:** The Asset Tag is automatically generated based on the selected Asset Type. This ensures consistent naming conventions across the organization.

4.2 Viewing Assets

To view all registered assets:

1. Navigate to **Assets** → **View** from the sidebar
7. The asset list will display all assets in a table format

Using Filters:

Use the filter options to narrow down the asset list:

- **Asset Tag:** Enter a specific asset tag
- **Serial Number:** Search by serial number
- **Asset Type:** Filter by asset category
- **Status:** Filter by asset status (In Stock, Assigned, Under Repair, etc.)
- **Location:** Filter by branch/location
- **Purchase Date Range:** Filter by purchase date period

Click **Search** to apply filters.

4.3 Viewing/Editing Asset Details

1. In the asset list, click **View/Edit** button for the desired asset
8. The asset detail form will be displayed
9. Make necessary changes to the editable fields
4. Click **Save Changes** to update the asset
5. Click **Cancel** to return to the list without saving

4.4 Viewing Assignment History

To view the assignment history of an asset:

1. In the asset list, click **History** button for the desired asset
10. A modal will display all past and current assignments for that asset
11. Information includes: Employee name, assignment date, return date, and notes

4.5 Deleting an Asset (Admin Only)

1. In the asset list, click **Delete** button for the asset
12. A confirmation dialog will appear
3. Click **Delete** to confirm deletion or **Cancel** to abort

> **Warning:** Deleting an asset is permanent and will remove all associated history. This action cannot be undone.

4.6 Asset Attachments

To add documents or images to an asset:

1. Open the asset details by clicking **View/Edit**
2. Scroll to the **Attachments** section
3. Click **Add Attachment** or drag and drop files
13. Supported file types: PDF, images (JPG, PNG), documents (DOC, DOCX)
14. Maximum file size: Check with your administrator

5. Assignment Management

5.1 Assigning an Asset (Admin Only)

To assign an asset to an employee:

1. Navigate to **Assignments** → **Assign** from the sidebar
15. Fill in the assignment form:

Asset	Select the asset to assign	Yes
Employee	Select the employee	Yes
Assignment Date	Select the assignment date	Yes
Notes	Additional notes about the assignment	No

3. Click **Assign Asset** to complete the assignment

Branch Transfer:

If the asset and employee are in different branches:

- A dialog will appear asking about branch transfer
- Choose one of the options:
- **Cancel Assignment:** Abort the assignment
- **Assign Without Transfer:** Assign but keep asset at original branch
- **Transfer & Assign:** Transfer asset to employee's branch and assign

5.2 Viewing Current Assignments

1. Navigate to **Assignments** → **View** from the sidebar
 16. The current assignments table displays:
- Asset information (tag, model, manufacturer)

- Employee name
- Assignment date
- Notes
- Actions (Return)

Use the search box to filter assignments by asset tag, model, employee, or notes.

5.3 Returning an Asset (Admin Only)

To return an assigned asset:

1. In the assignments list, click **Return** for the desired assignment
 17. A return dialog will appear
3. Enter the **Return Date**
4. Add any **Return Notes** (optional)
5. Click **Return Asset** to complete the return process

> **Note:** The returned asset's status will automatically update to indicate it's available for reassignment.

5.4 Assignment Attachments

To add handover documents or other attachments:

1. Click **Attachments** button for the assignment
 18. Upload relevant documents (handover forms, acknowledgment receipts, etc.)
 19. View or download existing attachments

6. Expense Management

6.1 Creating an Expense Record

To record an asset-related expense:

1. Navigate to **Expenses** → **Create** from the sidebar
20. Fill in the expense form:

Asset	Select the asset	Yes
Assigned Employee	Auto-populated based on asset assignment	Auto
Expense Type	Select the type (Purchase, Repair, Logistics, etc.)	Yes
Date	Date of the expense	Yes
Amount	Expense amount in Ksh	Yes
Vendor	Name of the vendor/supplier	Yes
Invoice Number	Reference invoice number	Yes
Notes	Additional details (optional)	No

3. Click **Save Expense** to record the expense

6.2 Viewing Expense History

21. The expense history table displays all recorded expenses
22. Use the search box to filter by asset, vendor, invoice number, or notes
23. The subtotal shows the sum of displayed expenses

Expense Table Information:

ID	Unique expense identifier
Asset	Asset tag and manufacturer
Model Name	Asset model
Date	Expense date
Vendor	Vendor/supplier name
Invoice #	Invoice reference number
Notes	Additional notes
Amount	Expense amount (Ksh)
Actions	View details and attachments

6.3 Expense Attachments

To attach invoices or receipts:

1. Click **View/Attachments** for the expense
2. Click **Add Attachment** to upload files
 24. Supported files: PDF, images, documents

7. Repair Requests

7.1 Overview

The Repair Request module allows users to submit requests for asset repairs and track their progress through a defined workflow.

7.2 Viewing Repair Requests

1. Navigate to **Repair Requests** → **All Requests** from the sidebar

25. View statistics cards showing:

- Total Requests
- Pending
- In Progress
- Completed

7.3 Filtering Requests

Use the filter options to find specific requests:

- **Status:** Filter by request status
- **Priority:** Filter by priority level
- **Type:** Filter by repair type
- **Branch:** Filter by branch/location
- **Search:** Free text search
- **My Requests Only:** Toggle to view only your submitted requests

Click **Filter** to apply or **Clear** to reset filters.

7.4 Creating a New Repair Request

1. Click the **New Request** button

26. Fill in the request form:

Title	Brief description of the issue	Yes
Asset	Select the asset needing repair	Yes
Type	Select the type of repair	Yes
Priority	Select urgency level	Yes
Description	Detailed description of the issue	Yes

3. Click **Submit Request**

7.5 Understanding Request Status

Pending	Request submitted, awaiting review
Approved	Request approved, pending action
In Progress	Repair work in progress
Completed	Repair completed
Rejected	Request was rejected
Cancelled	Request was cancelled

7.6 Request Workflow Actions

Depending on your role and the request status, you may have different actions available:

- **Approve:** Approve the request (Admin)
- **Reject:** Reject the request with reason
- **Start Work:** Begin repair work
- **Complete:** Mark repair as completed
- **Cancel:** Cancel the request

7.7 Viewing Request Details

27. Click on a request to view full details
28. View the complete request history and status changes
29. Add comments or attachments as needed

7.8 Repair Request Attachments

To attach diagnostic reports, photos, or other documents:

30. Open the request details
 31. Navigate to the attachments section
 32. Upload relevant files
-

8. Reports

8.1 Available Reports

The system provides several report types:

Assets Report	Comprehensive list of all assets with filters	All Users
Expenses Report	Detailed expense records with totals	All Users
Assignments Report	Asset assignment history	All Users
Repair Summary Report	Summary of repair requests	All Users
Action Logs Report	System activity audit trail	Admin Only

8.2 Assets Report

1. Navigate to **Reports** → **Assets**
 33. Apply filters as needed:
 - Asset Type
 - Status
 - Location/Branch
 - Purchase Date Range
3. Click **Generate Report**
4. Click **Export to Excel** to download the report

8.3 Expenses Report

1. Navigate to **Reports** → **Expenses**
 34. Filter by:
 - Date Range
 - Expense Type

- Asset
 - Vendor
3. Click **Generate Report**
 35. View totals and export as needed

8.4 Assignments Report

1. Navigate to **Reports** → **Assignments**
 36. Filter by:
 - Employee
 - Department
 - Branch
 - Date Range
3. Click **Generate Report**

8.5 Repair Summary Report

1. Navigate to **Reports** → **Repair Summary**
 37. View summary statistics by:
 - Status
 - Priority
 - Type
 - Branch
 38. Export for detailed analysis

8.6 Action Logs Report (Admin Only)

1. Navigate to **Reports** → **Action Logs**
 39. View all system activities including:
 - User logins
 - Asset modifications
 - Assignment changes
 - Administrative actions
 40. Filter by:
 - User
 - Action Type

- Date Range
 - 41. Export for audit purposes

8.7 Exporting Reports

All reports can be exported to Excel format:

- 42. Generate the desired report
 - 2. Click **Export to Excel** button
 - 43. The file will be downloaded to your computer
 - 44. Open with Microsoft Excel or compatible software
-

9. Administration

> **Note:** This section is only accessible to users with Admin role.

9.1 User Management

Viewing Users:

1. Navigate to **Administration → Users**
 45. View the list of all system users
 46. Search users by name, email, or department

Adding a New User:

1. Click **Add New User**
 47. Fill in the user information:
 - First Name, Last Name
 - Email Address
 - Phone Number
 - Department
 - Branch
 - Role
3. Click **Save**
 48. The user will receive login credentials via email

Bulk User Import:

1. Click **Bulk Import**
 49. Download the template if needed
 50. Drag and drop or browse for your file (.xlsx, .xls, or .csv)
4. Click **Preview Data** to review
 51. Review valid and invalid records
6. Click **Import Users** to complete

Editing a User:

1. Click **Edit** for the user
 52. Modify the necessary fields
3. Click **Save Changes**

Resetting User Password:

1. Click **Reset Password** for the user
 53. Confirm the action
 54. A new password will be sent to the user's email

Activating/Deactivating a User:

1. Click **Toggle Status** for the user
 55. Confirm the action
 56. Deactivated users cannot log in

9.2 Role Management

1. Navigate to **Administration** → **Roles**
 57. View existing roles and their permissions
 58. Add new roles if needed
 59. Edit role permissions

9.3 Branch Management

1. Navigate to **Administration** → **Branches**
 60. View all branches/locations
 61. Add new branches:
 - Click **Add Branch**
 - Enter branch name
 - Click **Save**
 62. Edit or delete existing branches

9.4 Department Management

1. Navigate to **Administration** → **Departments**
 63. View all departments
 64. Add, edit, or delete departments as needed

9.5 Asset Types Management

1. Navigate to **Administration** → **Asset Types**

65. View existing asset types

66. Add new types:

- Click **Add Type**
- Enter type name and code
- Set tag prefix for auto-generation
- Click **Save**

67. Edit or delete existing types

9.6 Asset Status Management

1. Navigate to **Administration** → **Asset Statuses**

68. View existing statuses

69. Add new statuses or modify existing ones

70. Common statuses: In Stock, Assigned, Under Repair, Disposed

9.7 Expense Types Management

1. Navigate to **Administration** → **Expense Types**

71. Manage expense categories:

- Purchase
- Repair
- Maintenance
- Logistics
- License
- Other

9.8 Repair Configuration

Repair Types:

1. Navigate to **Administration** → **Repair Types**

72. Manage repair categories (Hardware, Software, etc.)

Repair Statuses:

1. Navigate to **Administration** → **Repair Statuses**
 73. Configure status options for repair workflow

Repair Priorities:

1. Navigate to **Administration** → **Repair Priorities**
 74. Set priority levels (Low, Medium, High, Critical)
-

10. System Configuration

> **Note:** This section is only accessible to users with Admin role.

10.1 Accessing System Configuration

Navigate to **Settings** → **System Configuration**

10.2 General Settings

1. Select the **General Settings** tab

75. Configure:

- **Application Name:** The name displayed in the header and login page
3. Click **Save Changes**

10.3 Company Information

1. Select the **Company Information** tab

76. Configure:

- **Company Logo:** Upload your organization's logo (recommended: 200x60px, max 5MB)
- **Company Email:** Official contact email
- **Company Phone:** Contact phone number
- **Company Address:** Physical address

3. Click **Save Changes**

10.4 Email Settings

1. Select the **Email Settings** tab

77. Configure SMTP settings for system emails:

- **SMTP Host:** e.g., smtp.gmail.com
- **SMTP Port:** 587 (TLS) or 465 (SSL)
- **Use SSL/TLS:** Enable for secure connection
- **SMTP Username:** Email address for authentication
- **SMTP Password:** Password or app-specific password

- **From Name:** Sender name for emails
 - **From Email:** Sender email address
3. Click **Test Connection** to verify settings
 4. Click **Save Changes**

10.5 Security Settings

1. Select the **Security & Users** tab

78. Configure:

- Password policies
- Session timeout settings
- Login attempt limits

10.6 Storage Settings

1. Select the **Storage Settings** tab

79. Configure file storage options:

- Local storage path
- Firebase storage (if applicable)
- Maximum file size limits

11. Troubleshooting

11.1 Common Issues and Solutions

Cannot Log In

Problem: Unable to log in with correct credentials.

Solutions:

- 80. Verify you're using the correct email address
- 81. Check that Caps Lock is not enabled
- 82. Contact your administrator to:
 - Verify your account is active
 - Reset your password

Session Expired

Problem: Automatically logged out or "Session Expired" message.

Solution:

- This is normal after a period of inactivity
- Simply log in again to continue

Page Not Loading

Problem: Pages are slow or not loading.

Solutions:

- 83. Check your internet connection
- 84. Clear your browser cache
- 85. Try a different browser
- 86. Contact your IT support

Cannot Upload Files

Problem: File upload fails or shows error.

Solutions:

- 87. Check file size limits
- 88. Ensure file type is supported
- 89. Try a smaller file
- 90. Check your internet connection

Export Not Working

Problem: Cannot download exported reports.

Solutions:

- 91. Check if pop-up blocker is enabled
- 92. Ensure you have permission to download files
- 93. Try a different browser

11.2 Getting Help

If you encounter issues not covered in this manual:

- 1. **Contact Your Administrator:** For user account issues, permissions, or system access
- 2. **IT Support:** For technical issues with the system
- 3. **Training:** Request additional training sessions if needed

11.3 Best Practices

- 1. **Regular Logout:** Always log out when leaving your workstation
- 2. **Accurate Data Entry:** Double-check information before saving
- 3. **Timely Updates:** Record asset changes, assignments, and expenses promptly
- 4. **Attachments:** Upload supporting documents for audit trail
- 5. **Report Regularly:** Generate reports periodically for monitoring

Appendix A: Keyboard Shortcuts

Enter	Submit form / Confirm action
Escape	Close modal / Cancel action
Tab	Navigate between fields

Appendix B: Status Reference

Asset Statuses

In Stock	Available for assignment	Green
Assigned	Currently assigned to employee	Blue
Under Repair	Being repaired	Orange
Disposed	No longer in use	Red
In Transit	Being transferred	Yellow

Repair Request Statuses

Pending	Awaiting review
Approved	Approved for repair
In Progress	Repair ongoing
Completed	Repair finished
Rejected	Request denied
Cancelled	Request cancelled

Appendix C: Glossary

Asset	Any item of value owned by the organization
Asset Tag	Unique identifier for an asset
Assignment	Allocation of an asset to an employee
Branch	Physical location or office
Department	Organizational unit or division
Expense	Financial cost associated with an asset
Repair Request	Formal request for asset repair
Workflow	Defined process for approvals
