1. Introduction

1.1 Purpose

The Asset Management System is a comprehensive web-based application designed to help Jirani Smart track, manage, and maintain their assets throughout their lifecycle. This manual provides step-by-step instructions for all users to effectively utilize the system's features.

1.2 System Overview

The system provides the following core functionalities:

- **Asset Management:** Register, track, and manage organizational assets
- **Assignment Tracking:** Assign assets to employees and maintain assignment history
- **Expense Management:** Record and track asset-related expenses
- **Repair Requests:** Submit and manage repair requests with workflow approval
- **Reporting:** Generate comprehensive reports on assets, expenses, and activities
- **User Management:** Role-based access control for secure system usage
- **Permissions Management:** Granular permission control for each role and module
- **Branch Hierarchy:** Organizational branch structure with hierarchical data access

1.3 User Roles

The system supports flexible user roles with customizable permissions:

Role	Description	Access Level
Admin	Full system access including configuration and user management	All features
Standard User	Access to daily operations based on assigned permissions	Permission-based
Custom Roles	Configurable roles with specific permissions per module	Customizable

1.4 Permission Types

Each module can have the following permission types:

Permission	Description
Read	View records and data
Create	Add new records
Update	Modify existing records
Delete	Remove records
Branch Level Access	Restrict data access to user's branch only
Company Level Access	Restrict data access to user's company

2. Getting Started

2.1 Accessing the System

1. Open your web browser (Chrome, Firefox, Edge, or Safari recommended)
2. Navigate to your organization's Asset Management System URL
3. The login page will be displayed

2.2 Logging In

4. On the login page, enter your registered **Email Address**
5. Enter your **Password**

6. Click the **Login** button
7. Upon successful authentication, you will be redirected to the Dashboard

Note: If you forget your password, contact your system administrator to reset it.

2.3 Logging Out

8. Click on your **profile name** in the top navigation bar
9. Select **Logout** from the dropdown menu
10. You will be redirected to the login page

2.4 Navigation Overview

The system interface consists of:

- **Top Navigation Bar:** Displays the application name, your profile, and logout option
- **Sidebar Menu:** Main navigation menu for accessing different modules
- **Content Area:** The main working area where pages are displayed

Sidebar Menu Structure:

Menu Item	Sub-menu	Description
Dashboard	-	System overview and statistics
Assets	Create, View	Asset management functions
Assignments	View, Assign	Asset assignment functions
Expenses	Create	Expense recording functions
Repair Requests	All Requests, New Request, Workflow Config*	Repair management
Reports	Assets, Expenses, Assignments, Repair Summary, Action Logs*	Report generation
Administration*	Users, Roles, Permissions, Branches, Branch Hierarchy, Departments, etc.	System administration
Settings*	System Configuration	System settings

*Admin only (or based on role permissions)

2.5 Access Denied (403)

If you try to access a feature you don't have permission for, you will see an "Access Denied" page. This means:

- Your role doesn't have the required permission for this module
- Contact your administrator to request access if needed

3. Dashboard

The Dashboard provides a quick overview of your organization's asset management status.

3.1 Key Performance Indicators (KPIs)

The dashboard displays four main KPI cards:

KPI	Description
Total Assets	The total number of assets registered in the system
Total Asset Value	The cumulative purchase value of all assets (in Ksh)
Total Expenses	The total amount spent on asset-related expenses (in Ksh)
Active Assignments	The number of assets currently assigned to employees

Note: If your role has Branch Level Access enabled, the dashboard will only show data from your accessible branches.

3.2 Charts and Visualizations

The dashboard includes several interactive charts:

- 11. **Assets by Type:** Pie chart showing distribution of assets by category
- 12. **Assets by Status:** Chart displaying assets grouped by their current status
- 13. **Assets Distribution by Branch:** Bar chart showing asset distribution across branches
- 14. **Monthly Expenses Trend:** Line chart showing expense patterns over time

3.3 Recent Activity Tables

- **Recent Expenses:** Shows the latest expense entries with date, asset, type, vendor, and amount
- **Recent Assignments:** Displays the latest asset assignments

4. Asset Management

4.1 Creating a New Asset

To register a new asset in the system:

15. Navigate to **Assets** → **Create** from the sidebar
16. Fill in the required fields:

Field	Description	Required
Asset Type	Select the category of the asset	Yes
Asset Tag	Auto-generated based on asset type	Auto
Manufacturer	Enter the manufacturer name	Yes
Model	Enter the model name/number	Yes
Serial Number	Enter the unique serial number	Yes
Status	Select the current status	Yes
Location	Select the branch/location	Yes
Purchase Date	Select the date of purchase	Yes
Purchase Price	Enter the purchase amount	Yes
Notes	Additional notes (optional)	No

17. Click **Save Asset** to create the asset record
18. Click **Cancel** to clear the form

Note: The Asset Tag is automatically generated based on the selected Asset Type. This ensures consistent naming conventions across the organization.

4.2 Viewing Assets

To view all registered assets:

19. Navigate to **Assets** → **View** from the sidebar
20. The asset list will display all assets in a table format

Branch Level Access: If your role has branch level access enabled, you will only see assets from your assigned branch and its child branches.

Using Filters:

Use the filter options to narrow down the asset list:

- **Asset Tag:** Enter a specific asset tag
- **Serial Number:** Search by serial number
- **Asset Type:** Filter by asset category
- **Status:** Filter by asset status (In Stock, Assigned, Under Repair, etc.)
- **Location:** Filter by branch/location
- **Purchase Date Range:** Filter by purchase date period

Click **Search** to apply filters.

4.3 Viewing/Editing Asset Details

21. In the asset list, click **View/Edit** button for the desired asset
22. The asset detail form will be displayed
23. Make necessary changes to the editable fields
24. Click **Save Changes** to update the asset
25. Click **Cancel** to return to the list without saving

4.4 Viewing Assignment History

To view the assignment history of an asset:

26. In the asset list, click **History** button for the desired asset
27. A modal will display all past and current assignments for that asset
28. Information includes: Employee name, assignment date, return date, and notes

4.5 Deleting an Asset (Admin Only)

29. In the asset list, click **Delete** button for the asset
30. A confirmation dialog will appear
31. Click **Delete** to confirm deletion or **Cancel** to abort

Warning: Deleting an asset is permanent and will remove all associated history. This action cannot be undone.

4.6 Asset Attachments

To add documents or images to an asset:

32. Open the asset details by clicking **View/Edit**
33. Scroll to the **Attachments** section
34. Click **Add Attachment** or drag and drop files
35. Supported file types: PDF, images (JPG, PNG), documents (DOC, DOCX)
36. Maximum file size: Check with your administrator

5. Assignment Management

5.1 Assigning an Asset (Admin Only)

To assign an asset to an employee:

37. Navigate to **Assignments** → **Assign** from the sidebar
38. Fill in the assignment form:

Field	Description	Required
Asset	Select the asset to assign	Yes
Employee	Select the employee	Yes
Assignment Date	Select the assignment date	Yes
Notes	Additional notes about the assignment	No

39. Click **Assign Asset** to complete the assignment

Branch Transfer:

If the asset and employee are in different branches:

- A dialog will appear asking about branch transfer
- Choose one of the options:
 - **Cancel Assignment:** Abort the assignment
 - **Assign Without Transfer:** Assign but keep asset at original branch
 - **Transfer & Assign:** Transfer asset to employee's branch and assign

5.2 Viewing Current Assignments

40. Navigate to **Assignments** → **View** from the sidebar
41. The current assignments table displays:
 - Asset information (tag, model, manufacturer)
 - Employee name
 - Assignment date
 - Notes
 - Actions (Return)

Use the search box to filter assignments by asset tag, model, employee, or notes.

5.3 Returning an Asset (Admin Only)

To return an assigned asset:

42. In the assignments list, click **Return** for the desired assignment
43. A return dialog will appear
44. Enter the **Return Date**
45. Add any **Return Notes** (optional)
46. Click **Return Asset** to complete the return process

Note: The returned asset's status will automatically update to indicate it's available for reassignment.

5.4 Assignment Attachments

To add handover documents or other attachments:

47. Click **Attachments** button for the assignment
48. Upload relevant documents (handover forms, acknowledgment receipts, etc.)
49. View or download existing attachments

6. Expense Management

6.1 Creating an Expense Record

To record an asset-related expense:

50. Navigate to **Expenses** → **Create** from the sidebar
51. Fill in the expense form:

Field	Description	Required
Asset	Select the asset	Yes
Assigned Employee	Auto-populated based on asset assignment	Auto
Expense Type	Select the type (Purchase, Repair, Logistics, etc.)	Yes
Date	Date of the expense	Yes
Amount	Expense amount in Ksh	Yes
Vendor	Name of the vendor/supplier	Yes
Invoice Number	Reference invoice number	Yes
Notes	Additional details (optional)	No

52. Click **Save Expense** to record the expense

6.2 Viewing Expense History

53. The expense history table displays all recorded expenses
54. Use the search box to filter by asset, vendor, invoice number, or notes
55. The subtotal shows the sum of displayed expenses

Expense Table Information:

Column	Description
ID	Unique expense identifier
Asset	Asset tag and manufacturer
Model Name	Asset model
Date	Expense date
Vendor	Vendor/supplier name
Invoice #	Invoice reference number
Notes	Additional notes
Amount	Expense amount (Ksh)
Actions	View details and attachments

6.3 Expense Attachments

To attach invoices or receipts:

56. Click **View/Attachments** for the expense
 57. Click **Add Attachment** to upload files
 58. Supported files: PDF, images, documents
-

7. Repair Requests

7.1 Overview

The Repair Request module allows users to submit requests for asset repairs and track their progress through a defined workflow.

7.2 Viewing Repair Requests

59. Navigate to **Repair Requests** → **All Requests** from the sidebar
60. View statistics cards showing:
 - Total Requests
 - Pending
 - In Progress
 - Completed

7.3 Filtering Requests

Use the filter options to find specific requests:

- **Status:** Filter by request status
- **Priority:** Filter by priority level
- **Type:** Filter by repair type
- **Branch:** Filter by branch/location
- **Search:** Free text search
- **My Requests Only:** Toggle to view only your submitted requests

Click **Filter** to apply or **Clear** to reset filters.

7.4 Creating a New Repair Request

61. Click the **New Request** button
62. Fill in the request form:

Field	Description	Required
Title	Brief description of the issue	Yes
Asset	Select the asset needing repair	Yes
Type	Select the type of repair	Yes
Priority	Select urgency level	Yes
Description	Detailed description of the issue	Yes

63. Click **Submit Request**

7.5 Understanding Request Status

Status	Description
Pending	Request submitted, awaiting review
Approved	Request approved, pending action
In Progress	Repair work in progress
Completed	Repair completed
Rejected	Request was rejected
Cancelled	Request was cancelled

7.6 Request Workflow Actions

Depending on your role and the request status, you may have different actions available:

- **Approve:** Approve the request (Admin)
- **Reject:** Reject the request with reason
- **Start Work:** Begin repair work
- **Complete:** Mark repair as completed
- **Cancel:** Cancel the request

7.7 Viewing Request Details

64. Click on a request to view full details
65. View the complete request history and status changes
66. Add comments or attachments as needed

7.8 Repair Request Attachments

To attach diagnostic reports, photos, or other documents:

67. Open the request details
68. Navigate to the attachments section
69. Upload relevant files

8. Reports

8.1 Available Reports

The system provides several report types:

Report	Description	Access
Assets Report	Comprehensive list of all assets with filters	Permission-based
Expenses Report	Detailed expense records with totals	Permission-based
Assignments Report	Asset assignment history	Permission-based
Repair Summary Report	Summary of repair requests	Permission-based
Action Logs Report	System activity audit trail	Admin Only

8.2 Assets Report

70. Navigate to **Reports** → **Assets**
71. Apply filters as needed:
 - Asset Type
 - Status
 - Location/Branch
 - Purchase Date Range
72. Click **Generate Report**
73. Click **Export to Excel** to download the report

8.3 Expenses Report

74. Navigate to **Reports → Expenses**
75. Filter by:
 - Date Range
 - Expense Type
 - Asset
 - Vendor
76. Click **Generate Report**
77. View totals and export as needed

8.4 Assignments Report

78. Navigate to **Reports → Assignments**
79. Filter by:
 - Employee
 - Department
 - Branch
 - Date Range
80. Click **Generate Report**

8.5 Repair Summary Report

81. Navigate to **Reports → Repair Summary**
82. View summary statistics by:
 - Status
 - Priority
 - Type
 - Branch
83. Export for detailed analysis

8.6 Action Logs Report (Admin Only)

84. Navigate to **Reports → Action Logs**
85. View all system activities including:
 - User logins
 - Asset modifications
 - Assignment changes
 - Administrative actions
86. Filter by:
 - User
 - Action Type
 - Date Range
87. Export for audit purposes

8.7 Exporting Reports

All reports can be exported to Excel format:

88. Generate the desired report
 89. Click **Export to Excel** button
 90. The file will be downloaded to your computer
 91. Open with Microsoft Excel or compatible software
-

9. Administration

Note: This section is only accessible to users with Admin role or appropriate permissions.

9.1 User Management

Viewing Users:

92. Navigate to **Administration → Users**
93. View the list of all system users
94. Search users by name, email, or department

Adding a New User:

95. Click **Add New User**
96. Fill in the user information:
 - First Name, Last Name
 - Email Address
 - Phone Number
 - Department
 - Branch
 - Role
97. Click **Save**
98. The user will receive login credentials via email

Bulk User Import:

99. Click **Bulk Import**
100. Download the template if needed
101. Drag and drop or browse for your file (.xlsx, .xls, or .csv)
102. Click **Preview Data** to review
103. Review valid and invalid records
104. Click **Import Users** to complete

Editing a User:

- 105. Click **Edit** for the user
- 106. Modify the necessary fields
- 107. Click **Save Changes**

Resetting User Password:

- 108. Click **Reset Password** for the user
- 109. Confirm the action
- 110. A new password will be sent to the user's email

Activating/Deactivating a User:

- 111. Click **Toggle Status** for the user
- 112. Confirm the action
- 113. Deactivated users cannot log in

9.2 Role Management

- 114. Navigate to **Administration** → **Roles**
- 115. View existing roles and their descriptions

Adding a New Role:

- 116. Click **Add New Role**
- 117. Enter role name and description
- 118. Set active status
- 119. Click **Save Role**

Managing Role Permissions:

- 120. Click the **Permissions** button for a role
- 121. The permissions modal displays all modules
- 122. Configure permissions for each module (see Section 10)

Editing a Role:

- 123. Click **Edit** for the role
- 124. Modify the role details
- 125. Click **Save Changes**

Deleting a Role:

- 126. Click **Delete** for the role
- 127. Confirm deletion

Warning: Roles with assigned users cannot be deleted

9.3 Branch Management

128. Navigate to **Administration** → **Branches**
129. View all branches/locations
130. Add new branches:
 - Click **Add Branch**
 - Enter branch name and location
 - Click **Save**
131. Edit or delete existing branches

9.4 Department Management

132. Navigate to **Administration** → **Departments**
133. View all departments
134. Add, edit, or delete departments as needed

9.5 Asset Types Management

135. Navigate to **Administration** → **Asset Types**
136. View existing asset types
137. Add new types:
 - Click **Add Type**
 - Enter type name and code
 - Set tag prefix for auto-generation
 - Click **Save**
138. Edit or delete existing types

9.6 Asset Status Management

139. Navigate to **Administration** → **Asset Statuses**
140. View existing statuses
141. Add new statuses or modify existing ones
142. Common statuses: In Stock, Assigned, Under Repair, Disposed

9.7 Expense Types Management

143. Navigate to **Administration** → **Expense Types**
144. Manage expense categories:
 - Purchase
 - Repair
 - Maintenance
 - Logistics
 - License
 - Other

9.8 Repair Configuration

Repair Types:

- 145. Navigate to **Administration** → **Repair Types**
- 146. Manage repair categories (Hardware, Software, etc.)

Repair Statuses:

- 147. Navigate to **Administration** → **Repair Statuses**
- 148. Configure status options for repair workflow

Repair Priorities:

- 149. Navigate to **Administration** → **Repair Priorities**
 - 150. Set priority levels (Low, Medium, High, Critical)
-

10. Permissions Management

Note: This section is only accessible to users with Admin role.

10.1 Overview

The Permissions Management feature allows administrators to configure granular access control for each role. You can specify which modules and actions each role can access.

10.2 Accessing Permissions Management

- 151. Navigate to **Administration** → **Permissions**
- 152. The permissions management page displays

10.3 Managing Permissions

Selecting a Role:

- 153. Use the role dropdown to select a role
- 154. Search for a role by typing in the search box
- 155. Click on the role to load its permissions

Permission Types:

For each module, you can configure:

Permission	Description
Read	View records in this module
Create	Add new records
Update	Modify existing records
Delete	Remove records

Access Level Options:

Option	Description
Branch Level Access	User can only see data from their branch and child branches
Company Level Access	User can only see data from their assigned companies

10.4 Configuring Permissions

156. Select a role from the dropdown

157. The permissions grid displays all modules

158. Check/uncheck permissions for each module:

- Check **Read** to allow viewing
- Check **Create** to allow adding
- Check **Update** to allow editing
- Check **Delete** to allow removing

159. Enable **Branch Level Access** if data should be branch-restricted

160. Enable **Company Level Access** if data should be company-restricted

161. Click **Save Permissions**

10.5 Quick Actions

- **Select All:** Grant all permissions for all modules
- **Clear All:** Remove all permissions

10.6 Permission Statistics

The sidebar shows:

- **Permissions:** Total number of granted permissions
- **Modules:** Number of modules with at least one permission

11. Branch Hierarchy

Note: This section is only accessible to users with Admin role.

11.1 Overview

The Branch Hierarchy feature allows you to configure your organization's branch structure. This affects how data access is controlled across branches.

11.2 Understanding Branch Hierarchy

Key Concepts:

Concept	Description
Headquarters (HQ)	The main branch at the top of the hierarchy. Users in HQ can view data from all branches.
Parent Branch	A branch that has child branches under it. Can view data from all child branches.
Child Branch	A branch under a parent. Can only view its own data (unless it has children).

How It Works:

- When a role has **Branch Level Access** enabled for a module, users can only see data within their accessible branches
- A branch can access data from:
 - Itself
 - All its descendant branches (children, grandchildren, etc.)
- HQ can access data from all branches

11.3 Accessing Branch Hierarchy

162. Navigate to **Administration** → **Branch Hierarchy**

163. The hierarchy configuration page displays

11.4 Viewing the Branch Tree

The left panel shows the organization structure as a tree:

- **HQ Badge:** Indicates which branch is the headquarters
- **Branch Icons:** Shows the branch hierarchy
- **Child Count:** Displays the number of child branches

11.5 Configuring a Branch

164. Click on a branch in the tree
165. The configuration panel shows branch details
166. Configure:

Setting	Description
Parent Branch	Select which branch this branch reports to
Set as Headquarters	Mark this branch as the main HQ

11.6 Setting Up Hierarchy

Setting a Parent Branch:

167. Select a branch from the tree
168. Use the **Parent Branch** dropdown
169. Select the parent branch or "None" for root level
170. Click **Save Changes**

Setting Headquarters:

171. Select the branch to be HQ
172. Check **Set as Headquarters**
173. Click **Save Changes**

Note: Only one branch can be headquarters at a time

11.7 Example Hierarchy

In this example:

- HQ can see all data
- Regional Office East can see data from Branch A and B
- Branch A can only see its own data

12. System Configuration

Note: This section is only accessible to users with Admin role.

12.1 Accessing System Configuration

Navigate to **Settings** → **System Configuration**

12.2 General Settings

174. Select the **General Settings** tab

175. Configure:

- **Application Name:** The name displayed in the header and login page

176. Click **Save Changes**

12.3 Company Information

177. Select the **Company Information** tab

178. Configure:

- **Company Logo:** Upload your organization's logo (recommended: 200x60px, max 5MB)
- **Company Email:** Official contact email
- **Company Phone:** Contact phone number
- **Company Address:** Physical address

179. Click **Save Changes**

12.4 Email Settings

180. Select the **Email Settings** tab

181. Configure SMTP settings for system emails:

- **SMTP Host:** e.g., smtp.gmail.com
- **SMTP Port:** 587 (TLS) or 465 (SSL)
- **Use SSL/TLS:** Enable for secure connection
- **SMTP Username:** Email address for authentication
- **SMTP Password:** Password or app-specific password
- **From Name:** Sender name for emails
- **From Email:** Sender email address

182. Click **Test Connection** to verify settings

183. Click **Save Changes**

12.5 Security Settings

184. Select the **Security & Users** tab

185. Configure:

- Password policies
- Session timeout settings
- Login attempt limits

12.6 Storage Settings

186. Select the **Storage Settings** tab

187. Configure file storage options:

- Local storage path
 - Firebase storage (if applicable)
 - Maximum file size limits
-

13. Troubleshooting

13.1 Common Issues and Solutions

Cannot Log In

Problem: Unable to log in with correct credentials.

Solutions:

- 188. Verify you're using the correct email address
- 189. Check that Caps Lock is not enabled
- 190. Contact your administrator to:
 - Verify your account is active
 - Reset your password

Access Denied (403)

Problem: Seeing "Access Denied" when trying to access a feature.

Solutions:

- 191. Your role doesn't have permission for this module
- 192. Contact your administrator to request access
- 193. Ensure you're logged in with the correct account

Session Expired

Problem: Automatically logged out or "Session Expired" message.

Solution:

- This is normal after a period of inactivity
- Simply log in again to continue

Page Not Loading

Problem: Pages are slow or not loading.

Solutions:

- 194. Check your internet connection
- 195. Clear your browser cache
- 196. Try a different browser
- 197. Contact your IT support

Cannot See Expected Data

Problem: Missing data that should be visible.

Solutions:

- 198. Check if you have **Branch Level Access** enabled - you may only see data from your branch
- 199. Verify the data exists in your assigned branch
- 200. Check with your administrator about your permission settings

Cannot Upload Files

Problem: File upload fails or shows error.

Solutions:

- 201. Check file size limits
- 202. Ensure file type is supported
- 203. Try a smaller file
- 204. Check your internet connection

Export Not Working

Problem: Cannot download exported reports.

Solutions:

- 205. Check if pop-up blocker is enabled
- 206. Ensure you have permission to download files
- 207. Try a different browser

13.2 Getting Help

If you encounter issues not covered in this manual:

- 208. **Contact Your Administrator:** For user account issues, permissions, or system access
- 209. **IT Support:** For technical issues with the system
- 210. **Training:** Request additional training sessions if needed

13.3 Best Practices

- 211. **Regular Logout:** Always log out when leaving your workstation
 - 212. **Accurate Data Entry:** Double-check information before saving
 - 213. **Timely Updates:** Record asset changes, assignments, and expenses promptly
 - 214. **Attachments:** Upload supporting documents for audit trail
 - 215. **Report Regularly:** Generate reports periodically for monitoring
 - 216. **Check Permissions:** If you can't access something, verify your role's permissions
-

Appendix A: Keyboard Shortcuts

Shortcut	Action
Enter	Submit form / Confirm action
Escape	Close modal / Cancel action
Tab	Navigate between fields

Appendix B: Status Reference

Asset Statuses

Status	Description	Color
In Stock	Available for assignment	Green
Assigned	Currently assigned to employee	Blue
Under Repair	Being repaired	Orange
Disposed	No longer in use	Red
In Transit	Being transferred	Yellow

Repair Request Statuses

Status	Description
Pending	Awaiting review
Approved	Approved for repair
In Progress	Repair ongoing
Completed	Repair finished
Rejected	Request denied
Cancelled	Request cancelled

Appendix C: Glossary

Term	Definition
Asset	Any item of value owned by the organization
Asset Tag	Unique identifier for an asset
Assignment	Allocation of an asset to an employee
Branch	Physical location or office
Branch Hierarchy	Parent-child relationships between branches
Branch Level Access	Permission setting that restricts data to user's branch
Company Level Access	Permission setting that restricts data to user's companies
Department	Organizational unit or division
Expense	Financial cost associated with an asset
HQ (Headquarters)	Main branch at top of hierarchy
Module	Functional area of the system (Assets, Reports, etc.)
Permission	Access right to perform actions in a module
Repair Request	Formal request for asset repair
Role	User classification with specific permissions
Workflow	Defined process for approvals

Appendix D: Permission Module Codes

Module Code	Description
DASHBOARD	Dashboard access
ASSETS	Asset management
ASSETS_CREATE	Create new assets
ASSETS_VIEW	View assets list
ASSIGNMENTS	Assignment management
ASSIGNMENTS_VIEW	View assignments
ASSIGNMENTS_ASSIGN	Assign assets
EXPENSES	Expense management
EXPENSES_CREATE	Create expenses
REPAIR_REQUESTS	Repair request management
REPAIR_REQUESTS_LIST	View all repair requests
REPAIR_REQUESTS_NEW	Create new repair requests
REPAIR_REQUESTS_WORKFLOW	Configure repair workflow
REPORTS	Reports access
REPORTS_ASSETS	Assets report
REPORTS_EXPENSES	Expenses report
REPORTS_ASSIGNMENTS	Assignments report
REPORTS_REPAIR_SUMMARY	Repair summary report
REPORTS_ACTION_LOGS	Action logs report
ADMINISTRATION	Administration access
ADMIN_USERS	User management

Module Code	Description
ADMIN_ROLES	Role management
ADMIN_PERMISSIONS	Permissions management
ADMIN_BRANCHES	Branch management
ADMIN_DEPARTMENTS	Department management
SETTINGS	System settings
SETTINGS_SYSTEM	System configuration
